Faculty Position in B Cell Immunology

The Vaccine and Infectious Disease Division (VIDD) of the Fred Hutchinson Cancer Research Center seeks exceptional applicants for a full-time faculty position. The successful candidate will be expected to develop an independent, extramurally funded experimental B cell immunology program that integrates translational research in infectious diseases, vaccine development or immunotherapy. Applicants with research interests in the function of innate immune mechanisms in these areas may also be considered. The successful applicant will have a Ph.D., M.D., or equivalent degree. The primary selection criteria are excellence and creativity in research and scholarship.

VIDD scientists integrate computational, laboratory and clinical research methods to advance the understanding of microbial pathogenesis and infectious disease processes. VIDD has collaborative programs with laboratory, clinical and field sites in Africa, Asia, South America, and Europe. The person selected will have the opportunity to expand collaborations within this global network and with scientists at local institutions such as the University of Washington; the successful candidate will have a proven ability to establish productive cross-disciplinary collaborations. Salary DOE + excellent benefits.

Interested candidates should submit a CV, a concise research plan (1-2 pages), and the names and email addresses of three (3) references to: Dr. Martin Prlic, viddfao@fhcrc.org. Applications should be received by February 15th to assure consideration. Later applicants may be considered if the position has not been filled.

*The Fred Hutchinson Cancer Research Center is an affirmative action, equal opportunity employer.*
