RAISE STUDY

Do you take ART (Anti-Retroviral Therapy) and have an undetectable viral load? You could qualify for a study looking at the use of nutritional supplements in improving lung function.

Are you:
- Are HIV positive
- At least 21 years of age or older
- Have no major medical problems
- No history of Parkinson’s, Bipolar disease or Bleeding Disorder

If you qualify, you will be asked to:
- Have blood drawn
- Take nutritional supplements Zinc and SAMe daily
- Undergo a procedure called bronchoscopy
- Have up to 11 study visits over a 24 month period

Principal Investigator: David Guidot, MD

Research Coordinator:
Elena Morales, (404) 321-6111, ext. 6602
